Comments	Style	Robustness	Read.me
Grade: 3	Grade: 4	Grade: 4	Grade: 3
We liked how you used your comments to organize your methods depending on how/when they were implemented. However, we feel that comments should also be added to explain the purpose of some methods (poll first for example) and postcondition/return type.	We liek your style! Whitespace in the code is very nice to see and the varNames accurately represent their function.	Code all runs fine! Looketh good!	Doesn't show to-do list progress. It can also be organized a little better.
